

Crew Training Centre Nursling

CTC

CTC Aviation Group is a leading provider of aviation training and consultancy services to major airlines round the world. Our training courses are tailored to individual airline requirements including full TRTO provision, Instructor, Command and CRM programmes, as well as cadet and cabin crew training. The Crew Training Centre, Nursling is a state-of-the-art simulator facility.

Crew Training Centre - Nursling (part of CTC Aviation Services Ltd) is located on the outskirts of Southampton on the south coast of England and just eight miles from CTC's Corporate Headquarters and Crew Training Centre at Dibden Manor. Pilots training at Nursling will normally be based at our fully residential facilities at Dibden Manor or in one of our nearby hotels.

Facilities

The Crew Training Centre provides high-level training support for both Airbus and Boeing aircraft. Five flight simulators, including two Airbus A320 full flight simulators, a Boeing 737-3/4/500 full flight simulator and two Flight Training Devices for the Boeing 737-300 and Boeing 737-700. Complementing the simulators are a suite of specialist CBT (computer based training) classrooms, briefing rooms, two Airbus VFDs (virtual flight decks), a spacious refreshment area and comprehensive engineering support facilities. Ample car parking facilities are provided together with advanced security systems to protect the Training Centre and your crews.

Type Rating Training

To provide the most effective training environment we combine the traditional skills of the specialist technical instructor with dedicated CBT and integrate this activity with access to our flight training devices. This allows progressive skill and knowledge development as the type rating course progresses. This concept allows the pilot to master the automatic systems of increasingly complex modern jet aircraft. For the Airbus **A319/320/321** and their fully integrated flight deck we have the latest standard CBT courseware supported by two 'new concept' Virtual Flight Decks. These are fully functional electronic Airbus training devices used to develop flight procedures, system operation, flight management and LOFT style training –

all in a classroom environment. Our two JAA Approved Airbus A320 full flight simulators provide FBS and FFS training up to and including all testing and zero flight-time requirements.

The **Boeing 737** is similarly supported by a combination of CBT, intensive ground instruction and CTC's B737-300 and -700 Flight Training Devices. These high technology advanced trainers are qualified under JAR Standard 2A level 2 as a type specific training device. This confirms that the FTD fidelity, performance and handling closely represent the real aircraft. B737 training is also supported by our B737 'Classis' full flight simulator. This simulator carries approval for the -300, -400 and -500 variants of the 737 including the hardware changes required. The approval includes all training and testing elements up to and including zero flight-time.

CTC has been a strong supporter of 'bridge training', whether through Jet Orientation, MCC or our well established Airline Qualification Course. All five simulators hold dual approval as type specific training devices and as FNPT2 MCC approved under JAR Standard 3A.

How to find us

The Crew Training Centre Nursling is located three miles from the centre of Southampton on the south coast of England and just under two hours driving time from London.

By road 1 mile south of junction 3 (the M271 junction) on the M27(W).

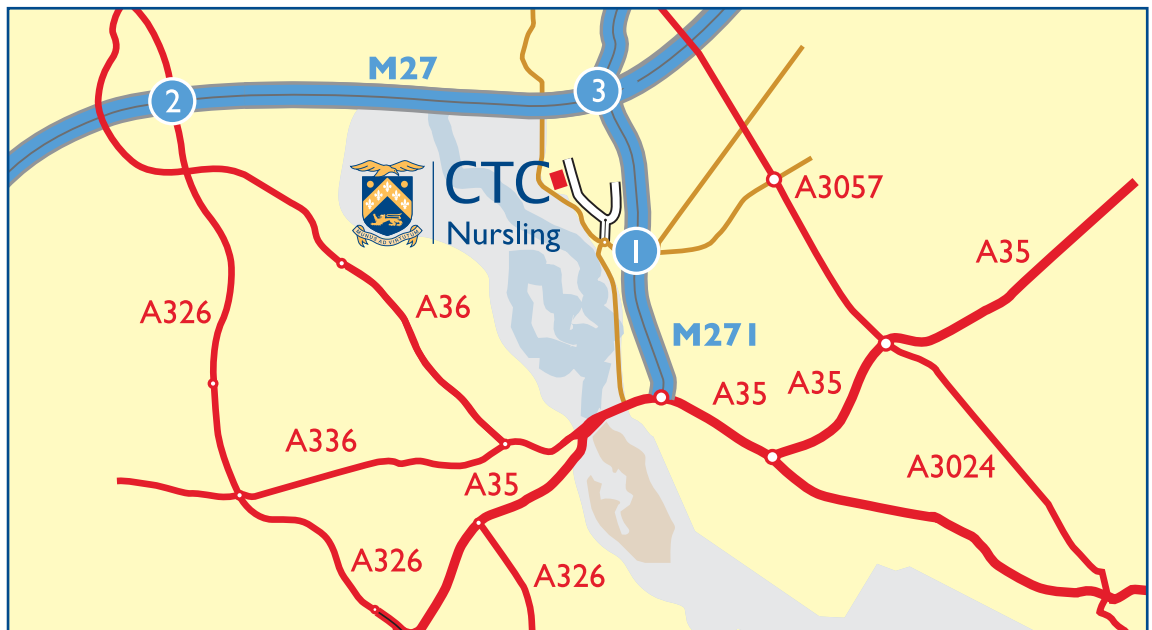

By rail 10 minutes drive from Southampton Central station, with frequent services to London and Gatwick.

By air 15 minutes drive from Southampton International Airport, 45 minutes from Bournemouth Airport, approximately one hour from Heathrow and just under two hours from Gatwick.

Directions

Leave the M27 West at Junction 3 onto the M271 and proceed south along the M271 towards Totton. Take the first sliproad off the M271 and at the top of the sliproad turn right over the motorway and into Nursling Industrial Estate.

At the next roundabout take the third exit into Franconia Drive, left at the next mini roundabout into Mauretania Road and the Crew Training Centre will be a short distance along on your left.

ABOUT CTC

CTC Aviation Group was established to provide a dedicated facility for airline-standard professional training. The company offers a comprehensive range of training and consultancy services that can be tailored to individual airline requirements. CTC's training portfolio includes courses for pilots and cabin crew at every stage of their careers including the unique CTC Wings programme – an innovative pilot training programme for both cadet and licensed pilots. In addition CTC provides Train the Trainer courses and Crew Resource Management training. Consultancy services include crew selection, training staff assessments, line support, recurrent training provision, fleet introductions and full management and operational support for airline start ups.
