CTC WINGS

MAKE YOUR CAREER FLY

WELCOME TO CTC WINGS

So you want to become an airline pilot? The right training background will ensure you are best placed to achieve that dream. CTC's approach is extremely specialist. We are all about training tomorrow's airline pilots today.

Known across the industry for providing the highest quality pilots, we are envied for our state of the art training facilities, highly qualified instructor teams and - most of all - for our long term partnerships with some of the best airline names around.

PREPARE FOR TAKE OFF

As an airline pilot, you will be responsible for the safety of your passengers, crew and aircraft. A daunting prospect perhaps, but if you enjoy the challenge responsibility brings, it makes for an extremely rewarding career.

If you have motivation, commitment and determination, we can provide the quality training that will turn your childhood dream into reality.

Courses commence all year round - apply today and make your career take off.

COURSE FOOTPRINT

Already well established in the European market and recently launched in New Zealand, CTC is a trusted supplier of pilots to our expanding list of global airline partners through our European and NZ routes. CTC Wings India aims to provide you with an NZ CAA Commercial Pilot's Licence & Multi Engine Instrument Rating - (CPL MEIR) with theoretical knowledge training to Airline Transport Pilot's Licence (ATPL) level.

CTC WINGS INDIA INTEGRATED TRAINING PROGRAMME: CREW TRAINING CENTRE - HAMILTON, NZ

Theoretical Knowledge (TK) Training to NZCAA PPL level and PPL flying	Theoretical Knowledge Training to NZCAA CPL level and CPL flying	Theoretical Knowledge Training to NZCAA IR level and IR flying
TK training to cover Private Pilot's Licence (PPL) relevant subjects. Preceding the PPL flying programme, the ground school is delivered using a combination of tutor-led lectures and CTC's state-of-the-art Computer Based Training (CBT). Single-engine flying where basic general handling skills are honed to PPL Level.	ATPL TK training to cover CPL relevant subjects. Multi-engine phase on the DA42 Diamond Twinstar; from general handling to the CPL Licence Skills Test. An introduction to applied instrument flying.	ATPL TK training to cover IR relevant subjects. Applied instrument flying on the DA42 where you will fly in controlled airspace with other commercial aircraft in preparation for your Instrument Rating skills test.

Your Pilot Training

Vertical Integration

From day one you will find yourself absorbed in an airline focused training environment where you will be coached to achieve the high standards expected within an airline. Whenever possible, you will do things the airline way ensuring the transition from training to operating with your future airline is as seamless as possible.

This concept is what we at CTC refer to as VI - Vertical Integration.

Technical Training

Your training will take place in New Zealand at our Crew Training Centre - Hamilton, on the North Island. New Zealand is an awesome place to learn to fly and, as a country, offers some amazing cultures to discover during your time there.

Our integrated approach to gaining a CPL MEIR incorporates theoretical and practical training as well as testing - all in one continuous course. Integrated programmes, compared to the modular route, are generally considered to be the preferred training approach by potential employers.

The course consists of theory training in all relevant aviation subjects integrated with the practical flying delivery. The theory and flying programme is scheduled in a structured way to ensure continuity of training and progressive steps designed to quickly improve the pilot skills being developed.

- Course length 65 weeks
- Single-engine flying 182.6 hours
- Multi-engine flying 20.0 hours
- Simulator flying 28.7 hours
- Ground Theory Training and briefings 600 hours

These flying hours meet all CAA NZ requirements for the issue of a CPL and MEIR. They will also meet the requirements for a CPL and MEIR as set by the Indian DGCA.

Non Technical Skills Training

Learning to be an airline pilot is not just about technical knowledge and ability. The multi-crew environment you will ultimately be flying in requires effective non-technical skills as well as technical aptitude. We work together to enhance your interpersonal and communication skills, professional attitude and self awareness in order to develop a safety first attitude and culture.

The Fleet

After you have completed the basics on one of our single-engine aircraft, you will progress onto our industry-leading twin, the DA42, which - with its Garmin 1000 flight deck and fully computerised engine management system (FADEC) - efficiently prepares you for the type of new generation Boeing or Airbus you are likely to fly in the future.

Intermediate and Advanced Training

Subject to placement opportunities in the future in India, you may then wish to progress further through CTC's world-renowned Airline Qualification Course (AQC) which incorporates the Multi Crew Co-operation course (MCC). Having completed the AQC course you can move forward with confidence into your type rating with an airline. CTC will endeavour to facilitate this on your behalf.

For more detailed course information, visit www.ctcwings.com and select 'India'.

ARE YOU UP TO THE CHALLENGE?

Safety and high standards are paramount in our industry, so you need to prove yourself during selection and apply yourself during training. In turn, we commit to ensuring we deliver the highest quality, airline focused training - we will also do our best to facilitate your progression into the airlines.

Places are only available to applicants who meet our strict criteria and pass a stringent selection process.

Do you have the potential?

To qualify you must:

- be at least 18 years of age on the date of application
- hold a minimum International English Language Testing System (IELTS) score of 5.5
- have completed 10+2 years of formal education with English language medium of instruction for your qualifying examination and a minimum of 50% in Mathematics and Physics

You will be required to gain a NZ visa prior to commencing your training with us. For further details on the Visa application process, visit the website www.ctcwings.com and select 'India'

Medical

Prior to commencing training you will be required to complete a medical examination for your NZ visa application and achieve a NZ CAA Class 1 Medical certificate. Additionally you will need to ensure that you meet the Indian Medical requirements. Although these tests can be carried out by any medical practitioner, we recommend that you get yours done by a Director General of Civil Aviation (DGCA) approved Medical Examiner.

Steps to success

Step One

Simply apply on line at www.ctcwings.com and select 'India'. Your application will then be thoroughly screened to ensure your suitability.

Step Two

If we think you are a suitable applicant, we will invite you to take part in an assessment day during which we will test your aptitude using the world's leading pilot aptitude testing system. Numerical ability will also be examined and we will ask you to take part in some group activities to evaluate your interpersonal team skills.

Step Three

This stage of our selection process involves an interview with your selection team, which also provides an opportunity for you to ask any questions you may have about the programme.

Note: Steps Two and Three are normally carried out on the same day.

Finance

One of our objectives with CTC Wings is to develop training programmes for aspiring airline pilots that will effectively prepare them for their future flying career by delivering high quality yet cost-effective, airline orientated training. Our Indian programme has been competitively priced and we have put together a package to cover accommodation at our purpose built Crew Accommodation Centre - "Clearways", located just a few minutes from the training centre. Please refer to the website for up-to-date prices.
